

# MD FAJLE RABBY

## Front End Developer

Chattogram, Bangladesh | +880 1863 223635 | mdfajlerabby00@gmail.com

[Linkedin](#) | [Github](#) | [Portfolio](#)

## SKILLS

---

### Front-End:

- **Expertise:** HTML5, CSS3, Tailwind, DaisyUI | **Comfortable:** Javascript, React

### Back-End:

- **Comfortable:** Firebase, NodeJs, ExpressJs, MongoDB, RESTful API

**Tools:** VS-Code, Git, Github, Figma, Chrome Dev Tool, Netlify, Vercel

## PROJECTS

---

### 1. Travel Nest - A Hotel Booking Website

- **Role-Based Functionality:** Implemented three user roles: User, Host, and Admin. Role-specific dashboards display relevant information and functionalities. Hosts can manage booking requests and availability, while Admins oversee statistics and user management.
- **Secure Authentication and Integration:** Firebase JWT tokens used for secure login and sign-up. Private routes implemented for Hosts and Admins, ensuring role-specific access. Integrated payment methods and calendar functionality for seamless transactions and booking management.
- **Tech Stack and User Experience:** Utilized front-end libraries like Axios, Tanstack Query, etc., enhancing user experience. Admin dashboard provides statistical insights into user activity, revenue, and booking trends. Robust user management system, allowing Admins to modify user profiles and permissions.

**Duration:** 18 days

### 2. Vista Forum - A Social Networking Platform

- Architected intuitive post creation with Tailwind & React, empowering users to instantly share their voices with a streamlined design.
- Crafted a dynamic profile system in NodeJs & MongoDB, enabling users to curate personalized identities and seamlessly update their stories.
- Executed streamlined user signup and authentication, leveraging the power of JWT token technology for enhanced security.

**Duration:** 4 days

### 3. Reef Techno - Simple Tech Shop with CRUD Operations

- Orchestrated user registration for personalized access, revolutionizing shopping with streamlined order management in "My Cart" using Firebase, Tailwind, and React.
- Engineered a fluid process for product addition, order review, and detail updates via the user-friendly feature, utilizing Node.js, Express, and MongoDB for a robust database infrastructure.
- Unlock exclusive features by registering for an account, ensuring personalized access and optimal user experience.

**Duration:** 3 days
